ℹ️ *Information*

A CLSID is a globally unique identifier that identifies a COM class object. For more information about a CLSID key and the function of it's subkeys in the registry, then see **CLSID Key (COM)**.

This tutorial will show you a complete list of **GUIDs** from the **CLSID** key in the registry that can be used to create shortcuts to directly open items with in **Windows 10**.

The **red** CLSID keys (GUIDs) in the table below are new to Windows 10.

💡 *Tip*

You can create a shortcut with a CLSID key (GUID) by adding either command below in front of the CLSID key (GUID).

Sometimes the shortcut will only work using one and not the other command below.

For example:

explorer shell:::{CLSID key}

OR

explorer /e,::{CLSID key}

Opens	CLSID key (GUID) shortcut
